Racing Stars

Lead Developer / CTO

July 2022 - Current

At Racing Stars I was brought on to lead the project. Currently I look after 5 developers in different timezones & skill levels. I also liase with the directors & external investors on a day-to-day basis acting as a middle-man between the development team and the C-Level directors. As my day-to-day I also develop and maintain the entire infrastructure.

About Me

I am a Systems Engineer with broad knowledge and technical skill in managing full software development lifecycle regarding analysis, design, installation, migration, upgrades, performance tuning, maintenance, troubleshooting, backup and restore of the database. Expert in advanced development methodologies, tools, and processes contributing to the design and rollout of cutting-edge software. I have a Pro-active attitude, I am stress tolerant with self-discipline and good adaptability.

Sykes Cottages

Senior Developer

April 2021 - July 2022

I played a key role in the shaping of the company's customer acquisition team, leveraging my technical expertise to drive growth and improve acquisition strategies. I worked closely with the team to develop custom solutions, I ensured that all software systems were thoroughly tested and optimized for performance, resulting in significant efficiency gains and cost savings for the business. Additionally, I collaborated closely with cross-functional teams to identify opportunities for process optimization and automation, streamlining operations and improving the scalability of the customer acquisition function.

I was able to build strong relationships and drive meaningful results for the business.

About Me

Senior Web Developer

July 2020 - April 2021

My day-to-day included management of our project management software, Jira & Trello.

- Maintaining & writing documentation on our web builds
